

WEB 2

L2INFO - PART 5

WHAT DID WE LEARN ?

- PHP basic syntax
- PHP as a web technology
- PHP is object oriented

WHAT IS NEXT ?

- How to use PHP in a real large project ?

STRUCTURE YOUR APPLICATION

SEPARATION OF CONCERNS

HOW TO DO THAT IN PHP ?

- `require / require_once`
- `include / include_once`

BASIC SEPERATION

- One class per file
- Separate html and php

EXERCICES

V'LILLE

Transpole has an api available to get data from their services in real time. Create a web app that displays realtime the stations with the number of bikes/spots available.

V'LILLE

- <http://vlille.fr/stations/xml-stations.aspx>
- <http://vlille.fr/stations/xml-station.aspx?borne=>

V'LILLE

- Use objects
- Separate concerns
